

Your cooling tower reliable partner

Engineering-led inspection, maintenance, parts and reconstruction for industrial cooling systems across Thailand and the region.

ESTABLISHED 2006

ISO 9001:2015 QMS

CTI MEMBER

One team across the tower lifecycle

FOUR CORE SERVICE LINES

01 Inspection and performance testing
Mechanical inspection, airflow and thermal measurement for evidence-based maintenance decisions.

02 Overhaul and maintenance
Preventive and corrective work for fans, gearboxes, drives and static tower components.

03 Parts replacement
Supply and installation of fill, drift eliminators, nozzles, fans and structural components.

04 Upgrade and reconstruction
Engineering redesign to restore performance, expand capacity and extend cooling-tower service life.

Built for industrial uptime

OVERHAUL WORKSHOPS

100+
APPROVED VENDOR LISTS

Dedicated overhaul workshop

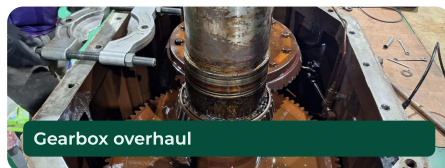

Fill replacement

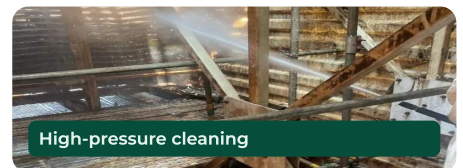

Fan performance inspection

Fan assembly installation

Gearbox overhaul

High-pressure cleaning

Inspect → Repair → Verify

One engineering team connects condition assessment, workshop overhaul, component replacement and post-work checks.

Plan your next cooling tower project.

Send us the tower type, operating duty and current issue. We will help define the inspection, repair or upgrade path.

Synergy Services operates an ISO 9001:2015-certified quality management system and is a member of the Cooling Technology Institute (CTI).
